

# PRASHANT KUMAR

## APPLICATION DEVELOPER

📍 Sindri, Dhanbad (Jharkhand)

✉️ [www.dkprashant04@gmail.com](mailto:www.dkprashant04@gmail.com)

### PROFILE INFO

I am a dedicated and proficient application developer with extensive experience in creating dynamic and user-friendly applications using both Java and Kotlin. With two years of hands-on experience in Android development, my expertise lies in developing robust, scalable, and efficient mobile applications that meet client needs and industry standards.

### EDUCATION

2022 - 2026

CHITKARA UNIVERSITY

- BTech - CSE
- 3rd year (1 Sem) Student

### SKILLS

- Android Development
- Java
- Kotlin
- Git & GitHub
- Firebase
- MVVM
- Data structures & Algorithm
- Dynamic Programming

### Good Idea about

- Dart
- C++
- C
- Python

### PROJECT EXPERIENCE

#### Short Videos Streaming App

2023

Java

- This is an app to share short videos with other people. We can share videos, like/dislike and comment on the videos, follow and unfollow users.
- it uses Firebase for the back-end.
- GitHub link :- [https://github.com/PrashantX02/Video\\_streaming\\_app](https://github.com/PrashantX02/Video_streaming_app)

#### Chat Application

2023

Java

- This is an online chatting app where users can create accounts and send messages to each other in real time .
- it uses Firebase for back-end.
- GitHub link :- <https://github.com/PrashantX02/MessageFunction>

#### Matchmaking Application

2024

Kotlin & Java

- This is an Ongoing project. In this Application users can create accounts and select the users they want to match . It has features like swappable cards where users can wipe left to dislike and right to like. The cards can be moved in any directions.
- GitHub link :- <https://github.com/PrashantX02/Tinder-With-card-Stack-Swipe>

#### Photo Editing Application (Artify)

2024

Kotlin

- This is an Ongoing project. In this Application users can adjust photo's saturation, shadow, Brightness and contrast using ColorMatrix and apply filters with ColorMatrix and GPUImage, Crop feature integrated with yalantis dependency. And also recently added Custom DrawView for Draw and DragView for drag-and-drop text and stickers functionality.
